

## Believed Plane Crash Victims

# Five Lago Men Feared Lost

Five Lago employees on a flying vacation have been given up as lost on a flight from British Guiana to Aruba. Wreckage believed to be part of the airplane in which they were traveling washed up on the Venezuela shore, but no trace of the men has been found.

All from Demerara, B.G., they are:  
Edward R. De Freitas, 29, pilot of the plane.

Joseph I. Castilho, 33.  
Oscar E. Nascimento, 36.  
Eric J. Jardine, 30.  
Henry F. Abraham, 30.

They left Aruba for British Guiana March 10 in a twin-engine Cessna airplane. Twelve days later they took off from British Guiana and headed for Aruba. Enroute, the plane reportedly developed engine trouble, and the men landed at Barcelona, Venezuela.

The morning of March 23 the plane headed once again for Aruba. The men have not been seen since. Two days later pieces of a wing which, pieced together, bore the letters PJ AAM — the Cessna's identification — were found on the shore some 20 kilometers from Higuero, Venezuela.

Venezuela and Netherlands West Indies officials are conducting a joint

inquiry, but their report has not yet been received. From unofficial sources, this account of the disappearance of the men was compiled.

Mr. Castilho and Mr. Nascimento, operators in Catalytic and Light Ends, Mr. Jardine and Mr. Abraham, assistant operators in C & LE and Mr. De Freitas, an acting operator in Receiving and Shipping, left Aruba for a visit to their homeland. All but Mr. Castilho were on vacation. He had taken a leave of absence.

On March 22 they left British Guiana for Aruba, but over Venezuela one of the plane's engine's reportedly developed trouble and Mr. De Freitas landed at Barcelona.

At 9:09 a.m. the next day the plane left the Barcelona airport for Aruba. Though the plane was radio-equipped, no further word was heard from the men.

When they failed to arrive in Cu-

raçao or Aruba, an investigation was started at Lago's request. Residents of the Higuero area reported hearing an airplane "in trouble" the morning of the 23rd, but the reports could not be authenticated.

On March 25 Creole Petroleum Co., which had assisted the Venezuela government in an air and sea search for the plane, cabied:

"Wing with marking PJAAM, undercarriage, and other piece fabric washed ashore 20 kilometers south-east Higuero on line of flight from Barcelona to Higuero. Plane undoubtedly fell into sea near this point Monday. No witnesses. Search continues by airplanes and boats. No trace of passengers or remainder of plane."

Creole pilots identified the wing pieces as being from a Cessna-type airplane. The markings, PJAAM, corresponded with those assigned the plane in which the men were traveling.

In addition to the search by Creole's planes, boats and men, the Venezuelan National Guard started

## 18 Lago Men's Employment To Pass 30 Years In '53

Eighteen men, now employed by Lago, will have over 30 years of service with the parent company by the end of 1953. One is a Staff and Regular employee, the other 17 are Foreign Staff members.

A Lago service breakdown showed that Alfonso C. Ydigoras of the Process-Cracking Department completed 31 years March 15. An assistant operator, he started with Lago in 1928 as a second class pipe fitter in the Pipe Department.

T. H. Harrod, who started with the parent organization in 1912, will have completed 41 years of service by the end of this year. He came to Lago in 1929 as a treater in Light Oil Finishing and is now process foreman in Distillation and Treating.

Mr. Ydigoras has more service than any other Staff and Regular Employee; Mr. Harrod has more service than any other Foreign Staff employee.

Two Foreign Staff men have 36 years of service. They are H. J. Mills and T. C. Brown. Three have 35

years; L. G. Miller, H. E. Jenkins and L. G. Lopez.

Two have 34. They are O. T. Borsch and W. Rae. Lago president J. J. Horigan has 32 years, W. L. Steihl, D. E. Johnson and K. H. Repath each has 31 years while M. C. Bates and G. R. Garrett each has 30 years.

Scheduled to reach the 30 year mark by the end of this year are four men who were employed in 1923. They are E. V. Miller, B. Teagle, C. B. Garber and M. H. Taylor.

### Vries Nombra Presidente di SPAC

Dos miembro nacional y uno no-nacional a worde eligi pa e tres puestonan mas halto den Comité Consultativo pa Problemanan Special.

Nacional Maximo Vries di Marine Department a worde nombra presidente; No-nacional G. E. Fernandez di Accounting Department a worde nombra como vice-presidente mientras Nacional Simeon Tromp di Light Oils Finishing a worde nombra como secretario.

Sr. Vries y Sr. Fernandez ta dos di e cinco hombernan eligi pa dos anja den SPAC luna pasá. Nan a worde eligi como funcionarianan di e comité durante nan reunion di cambio Maart 31. Sr. Tromp ta un miembro cu a keda den comité.

Otro miembronan di SPAC ta Nacional Genaro V. Roos di Safety Division y Fabiano S. Kelly di TSD, eligi luna pasá y miembro nacional cu a keda aden Juste de Vries; No-nacional Norbert C. Baptiste di Process Division, eligi luna pasá y miembro No-nacional Frank Mingo.

### Slight Temblor Shakes Aruba

A slight temblor, more apparent in the southeast quarter than in any other part of the island, shook Aruba at 5:42 p.m. March 29.

A. van den Berg, Aruba's director of Public Works, said no damage was reported.

### Olympiad Entry Forms May Be Obtained From Board Members

Entry forms for the 12th annual Queen's Birthday Olympiad may be obtained from members of the Lago Sport Park Board. The weightlifting contest and the body beautiful contests for men and women will be held Sunday, April 26, preceding the track and field events which will take place Wednesday, April 29.

Highlighting this year's track and field events will be night-time action under the newly installed lights at Lago Sport Park. Usually a daytime event, the Olympiad will be held for the first time at night starting at 6 p.m. The weightlifting and body beautiful contests will start at 10 a.m. at the Sport Park.

Twenty-nine events will be held. Entries must be returned to the Lago Sport Park Board not later than Thursday, April 23. Entries should be addressed to the Lago Sport Park Board, B.Q. No. 3, room 14.

### Fls. 300 Offered For Coat-Of-Arms

The Administrative Council of Aruba has offered a prize of Fls. 300 for a coat-of-arms for the island. Entries must be submitted before May 1.

Application forms and regulations covering the contest may be secured at the former governor's office on John G. Emanstraat.

## New Visiting Regulations Established at Hospital

### Revised Procedure Designed To Aid Patient Comfort Will Start With April 14 Opening

When the new hospital wing is put into service Tuesday, April 14, new visiting regulations will also take effect. The Medical Department has established new visiting procedures to maintain the comfort and care during visiting hours that patients have when the hospital is not open to visitors.

Patients who are permitted to have guests, may be visited from 2 to 3 p.m. and from 6 to 8 p.m. Children, who are allowed visitors, may be seen from 2 to 3 p.m. and from 6 to 7 p.m.

Upon entering the hospital, visitors must check at the reception desk where they will be given a visiting card. There are visiting cards for the use of the immediate family and cards for persons other than family members. The immediate family card is intended for only those family members who are eligible for medical service at the hospital. Three family members will be allowed to visit at one time. If there are more than three, the remaining family members may visit by multiple use of the card during visiting hours.

As an example, a family of six may divide up the visiting hours. The first three may visit the patient, return the card at the completion of their visit and thereby allow the remaining members of the family to use the card for the rest of the visiting period. If there happens to be more than six in a family, all family members may visit by decreasing the visiting time of each group of three and thus using the family card more times during the regular visiting period.

#### Non-Family Visitors

Two cards will be available for visits by persons other than family members. These cards may also be obtained at the reception desk in the main lobby. The cards request the visitor to confine the visit to 15 minutes so that other persons waiting to see the patient may use the card during the visiting hours.

When visitors leave the floor on which the patient is located, the visiting cards will be collected by nursing personnel and returned to the reception desk for re-issue to other visitors.

Children will be permitted to visit patients. In order to visit, however, they must have a visitor's card and be accompanied by an adult who also holds a visitor's card. If two adults and two children wish to visit, they must divide the visiting period in two with one adult and one child visiting at a time.

#### Special Cases

Only members of the immediate family may visit patients in the pediatrics section (children's section.) This regulation is the same as found in most hospitals which do not permit general visiting in children's rooms.

Obstetrical patients will not be permitted visitors other than the husband until the fifth day after delivery.

Only immediate family members will be permitted to visit in the hallway of the contagious disease section. The Medical Department reserves the right to restrict such visiting to one member of a family or to temporarily stop all visiting if medical circumstances require such a move.

If, in the opinion of the treating physician, a patient should not have an unlimited number of visitors for medical reasons, only designated family members will be permitted to visit the patient.

If a patient requests that no visitors be permitted, the desires of the patient will be granted.

### Clarificacion di Interes Ariba Prestamo

Un storia tocante tarifa di interes ariba prestamo den Thrift Foundation, den ultimo edicion di Esso News, podiser a laga algun lectores cu un impresion incorrecto.

Reportando cu e tarifa di interes pa prestamo ariba termino largo a worde reduci for di cuatro por ciento pa tres por ciento pa anja, e storia tabata parece di ta indica cu esaki ta aplica solamente ariba balancen di prestamo ariba termino largo cu ta existi cu entrada di Januari 1 di e anja aki.

En realidad e ta aplica ariba tur futuro prestamo ariba termino largo. Ariba prestamo, awor na vigor, sin embargo, e reduccion den interes ta aplica solamente ariba e balance cu no tabata pagá ainda dia 1 di Januari, y no retroactivamente ariba pagamento haci promer cu Januari 1.

## Regla Nobo di Bishita Na Hospital di Lago

**Procedimiento Revisá pa Yuda Comodidad di Pacientenan lo Drenta na Vigor April 14**

Ora e hata nobo na hospital worde poni na uso Diahuebes, April 14, reglanan nobo di bishita lo dreña na vigor tambe. Departamento Medico a establece procedimientonan nobo di bishita pa mantene e comodidad y cuido durante oranan di bishita mescos cu e pacientenan tin den oranan cu hospital no ta habri pa bishitantenan.

Pacientenan cu ta permiti pa recibi bishita, por worde bishita for di 2 pa 3 p.m. y for di 6 pa 8 p.m. Muchanan cu por recibi bishita, por worde mirá for di 2 pa 3 p.m. y for di 6 pa 7 p.m.

Drentando hospital, bishitantenan mester acudi na e mesa di recepcion unda nan lo haya un carchi pa haci bishita. Tin carchi di bishita pa uso di familia inmediata y carchi pa personanan otro sino miembronan di familia. E carchi pa familia inmediata ta intencioná solamente pa tal miembronan di familia cu ta eligible pa servicio medico na hospital. Tres miembro di familia ta permiti pa haci bishita na mes tempo. Si tin mas cu tres, e miembronan di familia restante por haci bishita door di usa e mes carchi mas vez durante oranan di bishita.

Por ehemplo, un familia di seis por parti e oranan di bishita. E tres promer por bishita e paciente, debolbe e carchi ora nan caba y asina permiti e otro miembronan di familia pa usa e carchi pa resto di e periodo di bishita. Si acaso tin mas cu seis den un familia, tur miembronan di familia por haci bishita reduciendo e tempo di bishita di cada grupo di tres y usando e carchi di familia mas vez durante e periodo regular di bishita.

### Bishitantenan cu no ta Familia

Dos carchi lo ta disponible pa bishitantenan door di persona cu no ta familia. E carchinan aki ta worde obtení tambe na mesa di recepcion den e salon principal. E carchi ta pidi e bishitante pa limita e bishita na 15 minuto asina cu otro personanan cu ta warda pa mira e paciente por usa e carchi durante oranan di bishita.

Ora bishitantenan laga e piso unda e paciente ta, e carchinan di bishita lo worde colectá door di nurse y debolbi na mesa di recepcion pa bolbe worde duná na otro bishitantenan.

Muchanan lo ta permiti pa bishita paciente. Sinembargo, pa haci bishita, nan mester tin un carchi y mester ta acompaña pa un hende grandi, cu tambe tin un carchi di bishita. Si dos hende grandi y dos mucha kier haci bishita, anto nan mester parti e periodo di bishita den dos cu un hende grandi y un mucha bishitando cada biaha.

### Casonan Special

Solamente miembronan di familia inmediata por bishita pacientenan den seccion di mucha. E regla aki ta mescos cu den mayoria hospital cu no ta permiti bishita general den cambenan di mucha.

Pacientenan obstetrico lo no worde permiti pa recibi bishita otro sino e esposo te di cinco dia despues di dunamento di luz.

Solamente miembronan inmediata di familia lo worde permiti pa haci bishita den e corredor di e seccion di malezanan contagioso. Departamento Medico ta reserva e derecho pa limita tal bishitacion na un miembro di familia of pa nenga temporariamente tur sorto di bishita si circunstancianan medico ta requeri un accion asina.

Si, segun opcion di e doctor cu ta trata un caso, un paciente no mester recibi un cantidad inlimitá di bishitantenan pa motihonan medico, anto solamente miembronan designá di familia lo worde permiti pa bishita e paciente.

Si un paciente pidi pa no permiti bishita cerca dje, anto deseonan di un tal paciente lo worde cumpli tambe.

### Consul Nobo di Panama Nombrá

J. Della Togna a worde nombrá como consul general di Panama den Antillas Holandes. El ta reemplaza Salvador Contreras. Consulado di Panama ta na Beatrixstraat 54, Oranjestad.

## Temblor Zwak A Sagudi Aruba

Un temblor zwak, sinti mas duro den parti sur di e isla cu na ningun otro lugar, a sagudi Aruba na 5:42 p.m. Maart 29.

A. van Berg, hefe di Obras Publicas na Aruba, a declara cu ningun daja a worde reportá.

## Aruba Will Renew Boat Registration

Aruba is once again requiring the registration of all boats.

A government representative explained that all vessels — motor, sail or oar powered — must be licensed. Registrations, he added, must be renewed each six months.

Registration forms require the type of the vessel, its name, the name of its captain, the name of the owner, address of the owner, the number of the crew and the names of the crew members.

Registration numbers must appear on either side of the bow of the craft.

Fishing boat registrations require a designation of the area in which the boat is allowed to operate.

## After 28 Years, G. Leo To Retire

Gregorio Leo, operator of the Marine Department's tug "Noord," will retire May 1 after 28 years of service. A National, he plans to remain in Aruba.

Mr. Leo was originally employed by the Esso Transportation Co. as a sailor in 1925. Six years later, he had become a shoreman in the Marine Department.

G. Leo

In 1932, he became a gangpusher and later on that year was appointed a Marine Department corporal. In October of 1932 he became second bosun and the next year became a tradesman, second class.

Mr. Leo was promoted to corporal B in 1936 and in 1940 was advanced to corporal A. His title was changed to launchman A in 1942.

He has operated the "Noord" since it went into service in September, 1949.

## Englishmen Wish Aruba Boy 'Luck' In Bottled Note

A girl in Ireland and a man in the United States made international headlines last year because the girl found a note in an aspirin bottle the man tossed over-board while crossing the Atlantic.

She wrote. He wrote. The news services learned of their developing romance. When he went to Ireland to see the girl, thousands of words were sent round the world on their meeting, their "dates" and their eventual decision not to marry.

Stories of this type — in which a note in a bottle played a leading role — are legion. Most of the bottles were afloat for months, and traveled thousands of miles.

Perhaps two Englishmen, A. Abernethy and C. Grant, had the stories in mind when they tossed a bottle containing a note over the rail of the S.S. Port Chalmers as it sailed from Curaçao March 25.

The note read, "Sailing 1953 on 'Port Chalmers'. This message was dropped over-board at 'Caracas Bay', Curaçao, March 25, 1953 from above vessel. May good fortune always follow the finder. Good luck and best wishes always!"

The bottle was picked up four days later and 60 miles away by John Easton, 11-year-old son of S. L. Easton of the Marine Department, as he walked along B.A. Beach.

## New Procedure Set Up On Presentation News

A different method of handling news of gift presentations made when employees are married or leave through resignation has been adopted. Stories containing all the information of interest will be carried, if the facts are made known to the Esso News staff, but pictures of the actual presentations will no longer be made.

(Retirement presentations in the plant will still be photographed if the group desires).

Up to now wedding stories have come to the Esso News only through scheduling of presentation pictures, whereas the News would like to carry more of these "personals." Give us the news on weddings whether or not a gift presentation is being made, and on presentations for men or women leaving the Company, phone in the details so the story can be carried.

## Missing Men

(Continued from page 1)

men patrolling a 40-kilometer area of the shore and sent boats combing the theoretical crash area.

Clark Jardine, brother of one of the missing men and C. Matthews, a friend, flew to Venezuela and for a number of days closely followed search efforts made by Creole and the Venezuelan government.

National Guard soldiers reported sighting what appeared to be an oil slick within the approximate crash area (66 degrees west). They also found a blue leather-covered seat — possibly from an airplane — on the shore.

On March 27 and 28, additional pieces of the plane washed ashore in the general area where the other wreckage was found. The location of the crash site, however, could not be pinpointed in relation to where the debris washed ashore.

It was pointed out that undercurrents might have carried the wreckage, Creole reported.

No luggage or equipment from the plane's interior was washed ashore, indicating the cabin might still be intact. In addition to continued air and surface searches, arrangements were made to grapple for the cabin.

The five men were veteran Lago employees. Mr. Castillo, Mr. Nascimento and Mr. De Freitas each had over 14 years of service; Mr. Jardine and Mr. Abraham had more than nine years of service.

**NOW IN EUROPE:** Aircraftman J. W. Stuart, son of Capt. and Mrs. Lionel Stuart, has been transferred to Zweibrücken, Germany, where the No. 3 Royal Canadian Air Force Wing has been relocated. Three RCAF Sabrejet squadrons flew the Atlantic last month, bringing Canadian fighter strength in Europe to nine squadrons. Aircraftman Stewart and other personnel of the squadrons were flown to Europe in North Star transport planes.

**AWOR NA EUROPA:** Aviator J. W. Stuart, yiu di Capt. y Sra. Lionel Stuart, a worde transferi pa Zweibrücken, Alemania, unda No. 3 Royal Canadian Air Force Fighter Wing ta stacioná awor. Tres Sabrejet di RCAF a hula atravez di Atlantico luna pasá, aumentando fortaleza Canades di combate na Europa te 9 escadrilla. Aviator Stewart y otro personal di e escadrillanan a bula hai Europa den aeroplano di transporte di North Star.

## Six Resort Designs Being Considered

The Administrative Council of Aruba currently is considering six designs submitted in a government-sponsored contest to find a plan for a proposed bathing resort at Palm Beach.

A prize of Fls. 500 will be awarded the design judged the best. Second and third place prizes are Fls. 250 and Fls. 100. The date the council's decision will be made known has not been decided.

Contestants were limited to a structure whose cost was not to exceed Fls. 150,000. The contest closed March 1.

The council said it was looking for "the best possible design" for "modern bathing facilities where tourists can enjoy themselves on the magnificent beaches of Aruba's Palm Beach."

## Vacation Regulation Amended for Domestic Servants

Under the amended N.W.I. Vacation Regulation, effective Dec. 30, 1952, domestic servants are entitled to a vacation of 12 working days each year. This applies to servants who work at least six days a week for one employer (householder), or if the servant lives in quarters provided by the employer regardless of the number of days worked per week.

Domestic servants are also entitled to proration of vacation in any service year in which the servant terminates after working six months in that year. The vacation in such a case is to be prorated at the rate of one working day for each full month of service. In the case of a servant who worked seven months and then terminated her employment, she would be entitled to seven days vacation.

## Sra. Madariagd Nombrá Agente Consular di Cuba

Sra. Regina Croes Oduber Madariagd, viuda di defunto Francisco Madariagd, a worde recientemente nombrá como agente consular di Cuba na Aruba.

**CARELESSNESS RESULTS IN WASTE:** A fleeting moment of carelessness, a hurried act without thought and a large expensive piece of equipment literally went "down the drain." Wednesday morning this costly transit mix truck plunged into the flume behind the concrete plant. Man hours were expended pulling the truck out; man hours will be expended repairing the vehicle; parts will have to be replaced — all because the vehicle was not properly parked. Fortunately no one was injured. Such incidents, however, could have tragic overtones in personal injury. Make sure the brakes on any vehicle are properly set when parked.

**DESCUIDO TA RESULTA DEN PIERDE:** Un instante di descuido, un accion purá sin pensa y un pida herment grandi y costoso practicamente "a bai awa". Diarazon mainta e truck costoso di mezela aki a cai den laman tras di planta di concreto. Cantidad di ora a bai perdi pa saca e truck; hopi ora lo worde gastá atrobe pa drecha e vehiculo; piezanan mester worde reemplazá — tur pa motibo cu e vehiculo no tabata propiamente pará. Afortunadamente ningun hende a haya desgracia. Tal incidentenan, sinembargo, por tin tononan tragico den desgracia personal. Ser segur cu rem di cualkier vehiculo ta bon halá ora bo para.

## 18 Empleado Acerca di 30 Anja di Servicio

Diez-ocho homber, awor emplea door di Lago, lo tin mas cu 30 anja di servicio cu e compania pariente na fin di 1953. Uno ta un empleado regular y di staff, e otro 17 ta miembronan di Foreign Staff.

Un repaso di servicio cu Lago a muntra cu Alfonso C. Ydigoras di process-Cracking Department a completa 31 anja Maart 15. Siendo un assistant operator awor, el a cuminsa traha cu Lago na 1928 como un pipe-fitter segunda clase den Pipe Department.

T. H. Harrod, kende a cuminsa traha cu e organizacion pariente na 1912, lo a completa 41 anja di servicio pa fin di e anja aki. El a bin traha cu Lago na 1929 como treater den Light Oil Finishing y awor ta process foreman den Distillation and Treating.

Sr. Ydigoras tin mas servicio cu cuakier otro empleado Regular y di Staff; Sr. Harrod tin mas servicio cu cuakier otro empleado Foreign Staff.

Dos empleado Foreign Staff tin 36 anja di servicio. Nan ta H. J. Mills y T. C. Brown. Tres tin 35 anja; L. G. Miller, H. E. Jenkins y L. G. Lopez.

Dos tin 34. Nan ta O. T. Borseh y W. Rae. Presidente di Lago, J. J. Horigan tin 32 anja di servicio. W. L. Stiehl, D. E. Johnson y K. H. Repath cada uno tin 31 anja mientras M. C. Bates y G. R. Garrett tin 30 anja cada uno.

Alcanzando e cifra di 30 anja mas despues den anja ta cuatro homber cu a worde emplea na 1923. Nan ta E. V. Miller, B. Teagle, C. B. Garber y M. H. Taylor.

## Vocational School Graduation Moved To Mid-July

In order to better space the activities of the Training Division, graduation for some 94 Vocational School students will be moved from mid-August to mid-July this year.

The 1953 graduates will be the first to complete the school's four-year program. The change in the graduation date will be permanent. The school year of 48 weeks will be retained by advancing the opening of classes one month.

Under the new school year, school officials will be better able to recruit, test and assign students and meet the needs of the refinery for apprentice personnel.

## NEW ARRIVALS

**March 20**  
GERMAN, Pauchito - Shipyard: A son, Wilfried Ambrosio Marcus.

**March 22**  
PAMPLIN, Albert M. - Marine Office: A son, Alfred Lennard.

**March 23**  
FARRERA, Manuel - M & C Yard: A son, Roberto.

**March 24**  
HAMILLET, Joseph B. - Col. Maint.: A daughter, Therese Veronica.

**March 25**  
CASSELL, James H. - Cracking: A daughter, Roselyn Elaine.

**March 26**  
DANIELS, Raleigh - M & C Mason: Twin daughters, Ann Marlyne & Ann Marvis.

**March 27**  
GIBBS, Clifford - Lake Fleet: A son, Clifford Henry.

**March 28**  
ELYDEN, Edward A. - Lake Fleet: A son, Chester Lawrence.

**March 29**  
WALTERS, Johannes L. - Lago Police: A son, Gerrit Gabriel.

**March 30**  
RAGAN, William P. - M & C Adm.: A daughter, Mary Catherine.

**March 31**  
NOEL, George S. - Lago Commissary: A daughter, Esther Viola.

**March 32**  
GLEZMAN, Epifanio - TSD Eng'r: A son, Urian.

**March 33**  
JOSEPH, Altonus - M & C Garage: A son, Rudolph Anthony.

**March 34**  
GEI, Mariano M. - Shipyard: A daughter, Maria Inocencia.

**March 35**  
EVERON, Luis R. - Marine: A son, Hyacintho Fileto.

**March 36**  
BROWN, Anthony - Lake Fleet: A daughter, Leillia Minerva.

**March 37**  
WILKIN, Simon - Cracking: A daughter, Jane Angelina.

**March 38**  
CROOKS, Gerardo - M & C Welding: A son, GERMAN, Luis - M & C Tint: A daughter, Rebecca Maria.

**March 39**  
PETERS, Wallace W. - Lago Police: A daughter, Agnes Theresa.

**March 40**  
TROMP, Ricardo C. - L.O.E.: A son, Freddy.

**March 41**  
ROBB, Elijah S. - Electrical: A daughter, Laurel Sheila.

**March 42**  
JOPLING, Arnold - M & C Adm.: A daughter, Carla Diane.

**March 43**  
HOWE, James - Lake Fleet: A son, Stephen James.

**March 44**  
SEMERIDA, Augustinus B. - Rec. & Ship.: A daughter, ST. JOUR, Paul - Industrial Relations: A daughter.

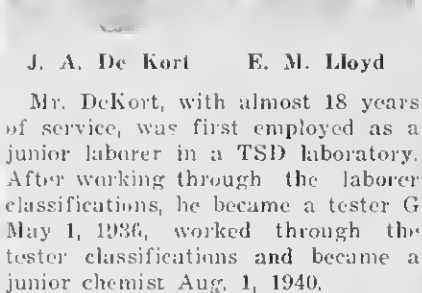

## J. A. De Kort, E. M. Lloyd Are Promoted

The promotion of two men - one a Technical Services Department employee, the other a TSD employee who was transferred to Colony Service - has been announced.

Effective April 1, J. A. De Kort was promoted to group head C in the Chemical Control Section of Laboratory No. 2; E. M. Lloyd was promoted to supervisor - Office and Technical Service, Colony Operations Divisions.

J. A. De Kort

E. M. Lloyd

Mr. DeKort, with almost 18 years of service, was first employed as a junior laborer in a TSD laboratory. After working through the laborer classifications, he became a tester G May 1, 1936, worked through the tester classifications and became a junior chemist Aug. 1, 1940.

Five years later he was promoted to analyst, then became senior analyst the next year from which he received his present advancement.

Mr. Lloyd was employed as a structural draftsman in TSD in December, 1944. Two years later, he was promoted to designer (structural), the next year became a designer and in 1949 was made acting group head B - Structure and Architectural Squad.

In November of last year, he transferred to Colony Service and held - on acting appointment - the position to which he was promoted April 1.

## Nominating Committee Named for LCAC Election in May

Eleven nationals and seven non-nationals have been named to the nominating committee for the annual election of the Lago Commissary Advisory Committee, May 27, 28 and 29.

The national members are Hacinthus E. Erasmus, Luis Kock, Juan N. Maduro, Guillermo Giel, Frederick Ritveld, Reginald Hartogh, Luisito Dirksz, Jan Maduro, Federico E. Acosta, Nicolaas Croes and Frans Maduro. The non-national group consists of Ellesmere Gilgrim, Sidney Alleyne, Reginald Cherebin, Charles A. Campbell, George Dos Ramos, Joseph I. de Caires and Cyril A. Brown.

The committee will select candidates April 15.

**WEDDING, FAREWELL GIFTS PRESENTED:** Armon G. Slater (upper left), who was married to the former Miss Supriana Rodriguez of Sabaneta, March 13, was given a check by fellow employees of the Mechanical Zone 3 office. A. S. MacNutt made the presentation. Miss Dorothy Stuart (upper right), who was married to Dr. A. M. de Booy, was given a vacuum cleaner by Executive Service Division co-workers. W. F. Erhardt (lower right), who left after four and one-half years of service, was given a suitcase, light meter and cigarette case by fellow Lago Commissary employees. The presentation of gifts was made by Dave Gray.

## Island Report

## U.S. Will Increase Panama Canal Capacity

A two-phase construction program to "substantially" increase the capacity of the Panama Canal was announced in Washington.

The Dutch, given 22 million articles of clothing after the country was devastated Feb. 1 by floods and a hurricane, needed only 2 million. At the risk of offending donors, they now want to give the surplus clothing to German, Arabian and other refugees. Portugal shipped in cases of port wine. Dutchmen don't drink port, don't know what to do with the donation. Some U.S. Congressmen want to ship surplus wheat, corn and butter to the Dutch who would like to get the grains, but have so much butter they'd like to ship some to the States if dairy product import restrictions weren't so tight.

Cash gifts totaled about \$27 million; one-tenth of the estimated Dutch loss.

The medals pictured above, cast in silver and bronze, are being offered for sale at cost. Proceeds of the sale will go toward Holland relief.

## John Easten ta Haya Mensaje den Botter Na B. A. Beach

Un mucha muher na Irlandia y un homber na Estados Unidos a haci historia internacionalmente anja pasa pa motilo cu e mucha muher a haya un mensaje den un botter di aspirin cu e homber a tira over di bordo ora el tabata cruzando Atlantico.

E mucha muher a scribi. E homber a scribi. E servicionan di noticia a tend: di nan romance desaroyando. Ora el a bai Irlandia pa mira e mucha muher, miles di palabra a bai rond di henter mundo tocante nan enuentro, nan compromisonan y eventualmente nan decision pa no casa.

Storianan di e sorta aki - den cual un mensaje den un botter a hunga un papel notable - tin na cantidad. Mayoria di e botterman a keda dèrief lunanan largo, y a bai miles di milla leuw.

Podiser dos Ingles, A. Abernethy y C. Grant, tabata pensa aniba e storianan aki ora nan a benta un botter cu un mensaje aden over di bordo di S.S. Port Chalmers ora esaki tabata saliendo for di puerto di Curaçao dia 25 di Maart.

E mensaje tabata bisa, "Nabegando 1953 ariba 'Port Chalmers'. E mensaje aki a worde tira over di bordo den Caracas, Bani, Curaçao, Maart 25, 1953 for di ariba e bapor. Dios laga cu buena suerte acompaña e hayabon semper. Bon suerte y nos mehor desearnan!"

E botter a worde coga cuatro dia despues y 60 milla leuw door di John Easten mientras el tabata cana canto di B.A. Beach.

## Mrs. Madariaga Named Cuban Consular Agent

Mrs. Regina Croes Oduber Madariaga, widow of the late Francisco Madariaga, was recently appointed Cuba's consular agent in Aruba.

## Vries Is Named SPAC Chairman

Two national and one non-national members have been elected to the top three posts of the Special Problems Advisory Committee.

National Maximo Vries of the Marine Department has been named chairman; Non-National G. E. Fernandez of the Accounting Department has been named vice-chairman while National Simeon Tromp of Light Oils Finishing has been named secretary.

Mr. Vries and Mr. Fernandez are two of five men elected for two years to the SPAC last month. They were elected committee executives at a "turn-over" meeting March 31. Mr. Tromp is a hold-over member.

Other members of the SPAC are Nationals Genaro V. Roos of the Safety Division and Fabiano S. Kelly of TSD, elected last month and hold-over National Juste de Vries; Non-National Norbert C. Baptiste of the Process Division, elected last month and hold-over Non-National Frank Mingo.

## New Panamanian Consul Appointed

J. Della Togna has been appointed Consul General of Panama in the Netherlands Antilles. He replaces Salvador Contreras. The Panamanian Consulate is located at 54 Beatrixstraat, Oranjestad.

... 'ta sali' tras di un mancha di pesca

## Pelican Is "Wonderful" As Fisherman, That Is

Part-Time Visitor To Aruba, He's One Of A Team That Performs Two Vital Functions For The Island

Pelicans may not be much for looks. They have the body of a duck, the neck of a stunted swan and a beak that beggars description. Even the male's color — brilliant in most birds — is hardly worth mentioning. Pelicans come in assorted mud-browns and blacks, with white markings on parts of some of the birds.

Their diet might be considered monotonous, being composed of fish mainly of a variety no one would fight over. Fancy homes don't seem to be a pelican's weakness either. Usually they rest in the water or roost on rocks in the shallows. When they do build a nest it is likely to be a pretty sloppy affair crudely perched in a low bush near the beach or haphazardly tossed together on the beach itself.

But when it comes to fishing! Well, a pelican has more tricks up his feathered sleeve than Rahoudini. There are less than a dozen kinds of pelicans and the species seen in Aruba is the only kind that takes aerial dives for its dinner. And each type seems to have its own set of tricks for keeping itself in vitamins.

Aruban ornithologist, Ernst Bartels thinks pelicans are shrewd and intelligent and that they lead an enviable social life. "They are very much team-spirited," he says.

"I had the privilege," reports Mr. Bartels, "to observe pelicans on the remote brackish-water swamps in western Java. They were of the Philippine variety, almost the biggest pelicans in existence.

"They would line a quarter of a mile or so of those shallow waters in close formation and then peddle to a narrow corner, with all the birds moving along concentric lines. In so doing they crowded the fish into close quarters. The fish finally had no choice but to dash right into the lowered bills the pelicans held at an inviting level under the water."

### Aerial Acrobatics

Aruban pelicans don't use this highly coordinated trick, but rely on spectacular aerial acrobatics. If you start early enough in the day, you can see them congregated on the rocks at Westpunt where they seem to be in caucus perhaps to discuss the day's fishing.

When a shoal of fish approaches the shallows, they ponderously take to the wing, usually most of the

150 pounds of food a day? People would think we were gluttons, but to a pelican his own weight in food each day is what dieticians might call "his minimum daily requirement."

The pelican has aroused the imagination of men for a long, long time, and speculation has led to several legends about these unique shore birds. One legend has it that pelicans will cut open their own breasts to feed the young when starving. This notion gives rise to use of the pelican as a symbol of care.

Mr. Bartels reports that the legend stems from the method pelicans use for the transportation of babyfood, that is to say, fish. The parent pelican swallows fish alive and brings it home in the stomach. To feed the ravenous chicks, they sit up straight and regurgitate the now dead fish, thus feeding it to the young. In the process they keep the long beak downward, almost against the breast. Naturally, blood (of the fish) sometimes shows. Hence the legend.

Some believe that the huge pouch which the pelican carries between the two parts of the lower section of the bill and which extends partly along the throat is a gizzard. Others believe the pouch is permanently rigid.

### Elastic Pouch

"The pelican's pouch," says Mr. Bartels, "is an ingenious contraption serving more or less like a landing net." The pouch itself is an elastic membrane which the pelican can expand when catching or swallowing fish. Generally, the bill is long and straight.

Pelicans in Aruba are "stay-over tourists." They breed up north, in the Caribbean and on the U.S. mainland. There are periods when the birds are rather scarce along our shores, generally during the breeding period which is about mid-year. Some old hands don't seem to bother about the trips north, so you can usually see some few birds here throughout the year.

"In Nature's immense production plant," Mr. Bartels says "pelicans have, as do all animals and plants, a well defined task. Theirs is to trim the surpluses of a specific category of fish, namely the fast surface dwellers. Those that are too big for smaller kinds of birds.

"The most important part of their job is to fertilize the barren soil on which they sit. That is how rocky soil is made suitable for plant growth. Incidentally, most sea birds have this task, although there are some exceptions," he says.

### Not Harmful

Men might reason that pelicans are "harmful" and rob humans of their fish supply. There is no need to worry about our friends the pelicans on this score. Examination of samples of fish taken by the pelican show that only a very minor portion proved to be of a kind considered "edible" by man.

There are rumors that pelicans used to breed at Westpunt during "the old days." Recently, no nests have been reported. Pelicans make crude nests, either on the ground or on low shrubbery and lay two to three whitish eggs. The nests or the eggs should never be disturbed or the pelicans will be discouraged from making their homes here. If you should see a nest, Mr. Bartels — who makes a study of these things and reports his findings to the government — would be very glad to hear about your discovery.

But whether they nest here or not, it's a whale of a lot of fun to watch the pelicans dive and cavort along Aruba's shores.

... the pouch - elastic - disappears  
... the bocchi - elastico - ta desaparece

crowd, sometimes fifty or more. A few will stay behind, content to bask in the sun. The flight party moves over the shoal and then the fun begins.

Flying from three to 30 feet above the water, the pelicans peer this way and that until a fish is spotted. Then, in a move known to aviators as a "Split-S" each bird pulls up in mid-flight, turns over and heads for his target.

With swept-back wings held rigid and beaks extended, they plunge like jet planes to the attack. Just before he hits the water, the pelican folds his wings; there is a sharp, neat splash of water and an instant later the pelican is back on the surface looking very satisfied with himself. He seldom if ever misses. (One thing aids his aim. A fish under water can't see very clearly what is coming at him from the sky and so has little time to dodge.)

### Another Sweep

After a few minutes, the pelican will take to the air again for another sweep over the fishing grounds. This goes on at intervals all day. It is very probable that a pelican swallows and digests his own weight in fish each day. Suppose we were to eat

... they sit in caucus, congregated on the rocks  
... nan ta den reunion ariba baranca

## Mundo di Rogans ta Tranquil Pero en Accion y Piscanan

Un rogans no ta mucho particular pa vista. Nan tin curpa di un pato, nek di un zwaan pashumá y un bek cu no ta vale la pena describi mes. Hasta color di e macho — brillante pa mayoria parjanan — apenas vale la pena menciona. Color di rogans ta bruin sushi y preto den diferente asortacion cu marca blanco ariba algun di e parjanan.

Nan cuminda mester worde considerá monotono, siendo compo di pesca principalmente y den un variedad cu ningun hende lo pleita ariba. Cas bunita tampoco ta un cos cu e rogans ta antoga mucho. Normalmente nan ta sosaga den awa of ta drumi ariba barancanan den awanan no mucho hundo. Ora nan traha un neishí probablemente e ta bini algo slous den un mata abao na canto di awa of poni cualkier parti ariba playu mes.

Pero ora yega na piscamento! Wel, anto si un rogans ta muntra cu el sabi mas triki cu Rahoudini. Tin menos cu un dozijn sorto di rogans y e clase cu tin na Aruba ta e unico sorto cu ta haci aerobatico aereo pa su cuminda. Y cada clase parece tin su mes trikinan pa busca nan vitamina. Ernst Bartels, ornithologista na Aruba, ta kere cu rogansnan ta sabi y inteligente y cu nan ta hiba un bida social envidiable. "Nan ta gusta coopera cu otro", el ta bisa.

"Mi tabatin e privilegio", Sr. Bartels ta reporta, "pa observa rogansnan den e pantanonan leuw di awa braak den parti occidental di Java. Nan tabata di e variedad Filipino, casi e clase di mas grandi cu ta existi.

"Nan lo ocupa como un cuarto milla di e awa den formacion cerrá y nan ta camina contra den un skina chikito, cu tur e parjanan moviendo segun linjanan concentrica. Haciendo asina nan ta cerra e piscanan. Por ultimo e piscanan no tin otro mado di haci, sino di corre drenta den piek habri cu e rogans ta tene na un nivel invitante bao awa."

### Aerobatico Aereo

Rogansnan di Aruba no ta usa e triki bon coordiná aki, pero ta confía ariba un espectacular sorto di aerobatico aereo. Si bo lamta bastante tempran, anto bo por mira nan reuní hunto ariba barancanan na Westpunt discutiendo e situacion di piscamento pa e dia.

Ora un mancha di piscá ta acerea, nan ta lamta bula, generalmente mayoria di nan, tin ora cincuenta of mas. Algun ta keda atras, contento pa tuma calor di solo. E vuelo ta pasa ariba e mancha y despues e pret ta cuminda.

Bulando for di 3 pa 30 pia ariba awa, e rogansnan ta waak cuidadosamente pa tur banda te ora nan mira un pesca. Anto, den un movecion cu aviadornan conoce como un 'Split-S' cada parja ta lamta un poco den plena vuelo, ta bira y ta laga baha ariba su victima.

Cu su halanan teni firmemente patras y su piek gerek nan ta laga baha mesos cu un aeroplano cu ta haci un atake. Poco promer cu e dal den awa, e rogans ta cerra su hala; ta sigui un spartmento di awa y un instante despues e rogans ta ariba atrabe aparentemente masha satisfecho cu su actuacion. Casi nunca el ta hera. (Un cos ta yudele hopi. E pesca bao awa no por mira bon kiko ta baha for di laria ariba dje y asina no tin mucho tempo pa sconde).

### Un Biaha Mas

Despues di algun minuto, e rogans ta den aire atrobe pa bolbe recorrer e terreno di piscá. Esaki ta sigui na intermedio henter dia largo. Ta muy probable cu un rogans ta guli y digeri su mes peso na piscá tur dia. Supone cu nos bai come 150 lb. di cuminda pa dia? Hendenan lo bisa cu nos ta golos, pero pa un rogans su mes peso na cuminda tur dia ta leke dieteticonan lo yama "su minimo requerimiento pa dia."

Rogansnan a lamta imaginacion di hende hopi, hopi tempo, y speculation a guia na varios leyenda tocante e unico parja costal aki. Un leyenda ta bisa cu rogansnan ta habri nan mes p'cho pa duna nan yiunan chikito cuminda ora esakinan ta bai muri di hamber. Esaki ta haci cu rogansnan ta worde considerá como un simbolo di cuida.

Sr. Bartels ta reporta cu e leyenda ta origina for di e metodo cu rogansnan ta usa pa transportacion di cuminda pa nan yiunan chikito, esta piscá. E rogans ta guli piscá bibo y ta mande'le pa su stoma. Pa duna e chikitonan cuminda, nan ta sinta recht y ta saca e pesca morto, y ta laga e chikitonan come. Ora nan ta haci asina nan ta tene e piek abao, casi contra nan pecho. Naturalmente sanger (di e pesca) ta muntra algun vez. Y asina e leyenda a bin existi.

(Continúa na pagina 5)

... on swept-back wings, they dive like jet planes  
... cu halanan atras, nan ta 'dive' manera aeroplano

## Asiento Grabs First Leg On Lago-Shell Net Trophy

Asiento's tennis team gained the first leg on a new trophy this Easter weekend with a 6-3 win over the Esso Tennis Club at the Rust en Burgh Tennis Courts at Emmastad, Curaçao.

It was the first time the teams competed for the trophy which was jointly sponsored by Lago and Royal Dutch Shell. The cup replaced the former Smith-Noorduyn trophy which was retired by the Curaçao club.

Asiento swept the April 4 competition when it won the mixed doubles, 2nd men's doubles, ladies doubles and 2nd men's singles matches. The Esso Club came back the next day with victories in the 1st men's doubles, 1st men's singles and 3rd men's doubles while losing the ladies' singles and the 3rd men's singles.

Winning Esso club members were Leon Annmann and L. S. McReynolds in 1st men's doubles; Dirk v.d. Linden, Jr., in 1st men's singles and Gordon Cole and Gene Goley in 3rd men's doubles.

The results:

Mrs. Godefroy and Went (A) over Mrs. Hamelers and Dorwart (E) - mixed doubles; 6-2, 6-3.

Schnepper and Tjcken Willink (A) over Whelan and v.d. Heuvel (E) - 2nd men's doubles; 7-5, 6-2.

Mrs. Rosenthal and Mrs. Reitsma (A) over Mrs. Peeran and Mrs. Freundel (E) - ladies' doubles; 6-0, 6-1.

v.d. Wal (A) over Axelson (E) - 2nd men's singles; 6-3, 5-7, 7-5.

Ammann and McReynolds (E) over Godefroy and Rosenthal (A) - 1st men's doubles; 4-6, 6-3, 6-4.

v.d. Linden, Jr. (E) over de Jongh (A) - 1st men's singles; 6-1, 6-8, 6-2.

Mrs. Stomp (A) over Mrs. Wright (E) - ladies' singles; 6-3, 7-5.

Brakke (A) over Lambert (E) - 3rd men's singles; 8-6, 7-5.

Cole and Goley (E) over Oostlander and Cnnee le Roy (A) - 3rd men's doubles; 6-2, 3-6, 11-9.

## 1953 Olympiad Schedules 29 Athletic Events

Twenty-nine track and field events have been scheduled for the 1953 Queen's Birthday Olympiad at the Lago Sport Park planned for the night of April 29.

Although part of the Olympiad, a weight-lifting contest will be staged at the park a few days prior to the track and field competition. Definite scheduling of both phases of the annual affair is dependent upon the completion of installation of playing field lights.

The top event of the 13th annual Olympiad will be a "Body Beautiful" contest for women.

Track and field events are:

Kite flying; five-mile foot race; 100-yard foot race for boys up to 16 years; one-half mile bicycle race; open 100-yard foot race; blindman's bluff; 100-yard foot race for men over 17 years; one-mile bicycle race (B Class); 220-yard foot race; 50-yard thread and needle race for girls; 50-yard three-legged race for apprentices and office boys; 440-yard relay team foot race; one-mile bicycle race (A Class); shot put; two-mile bicycle race (B Class); 440-yard foot race; discus; pillow fight (boys); one-half mile foot race; three-mile bicycle race; 50-yard sack race; 100-yard foot race (open to Lago employees 35 and over); 100-yard hurdles; 100-yard three-legged foot race; high jump; 100-yard foot race (girls); one-mile foot race; broad jump; obstacle race and five-mile bicycle race.

## 'Old-Timers' Come Out For Season Finale

WINDED BUT GAME... these 15 "old-timers" posed with a basketball which proclaimed them "53 Champs" after their appearance the night of March 31 at the Junior Esso Club court. They took part in the wind-up of the colony basketball season. Left to right they are (first row) Virgil Reeve, Walter Huffman, Ronald Engle, John Mechling, Curtis Osborne, James Koshorough; (second row) Kenneth Springer, William Rae, Orlo Thomas, Rae Brown, Robert Dorwart, William Keefer, Frank Burson, Joseph Proterra and Leonard McReynolds.

## St. Eustatius - Curaçao - Takes Cricket Tournament

The St. Eustatius Cricket team of Curaçao, playing two matches against the St. Eustatius team of Aruba over Easter week-end at the Lago Sport Park, swept the meeting with a 20-run victory in the first match and a 10-run win with eight wickets intact in the second match.

The visiting team was first at bat in the "colts" match" played April 4. The Curaçao club scored 164 runs in its inning. Aruba could muster only 144 runs.

In the test match played Sunday and Monday, Aruba was first at bat and scored 104 runs in its inning. St. Eustatius of Curaçao scored 139 in its inning and Sunday's play ended with the visiting team ahead by 35 runs.

Aruba batted first Monday and scored 127 runs in its inning, but the Curaçao team came back with 102 runs for two, giving the visitors a 10-run win with eight wickets intact and victory in the three-day annual tourney.

## NAMES in the MAJOR LEAGUES

The Brooklyn Dodgers and New York Yankees are still at it. In a recent exhibition meeting of the two teams, the Dodgers nipped the Yanks 1-0 in one of the finest games played in the Grapefruit League. As one sportswriter said all that had to be done was to remove the palm trees, lower the temperature a bit and it might just as well have been a World Series game the play was so superlative.

x x x

President Eisenhower will not be on hand to throw out the first ball opening the 1953 season. He will be on a short vacation and Vice-President Nixon will handle the assignment. Clark Griffith, president of the Washington Senators, made his annual visit to the White House to ask the President to throw out the first ball. Griffith has been making this request of U.S. presidents since 1910.

x x x

The sports world mourned the passing of two prominent figures recently. Alva Bradley, 69, former owner of the Cleveland Indians, died March 29. Mr. Bradley's greatest feat in baseball was the acquisition of Bob Feller, one of the game's most sensational pitchers. The other figure who left the sports scene was Jim Thorpe, 64, who was probably one of the greatest all-around athletes the international sports world has ever had the privilege of seeing.

x x x

Besides Thorpe's many track and field accomplishments, he was exceptionally skilled in football (American), lacrosse, boxing, rough-and-tumble, basketball, hockey, archery, rifle shooting, canoeing, handball, swimming, skating and baseball. He played professional football for 15 years and professional baseball for seven years. During his big league career, he played for the New York Giants and Boston Braves.

x x x

Three important men in the plans of two metropolitan teams have their managers greatly concerned. Billy Cox, Gil Hodges and Mickey Mantle have been sitting on the sidelines the past few days nursing aches and pains. Cox is having trouble with his back, Hodges his ankle and leg and Mantle with boils and rashes. Both Chuck Dressen and Casey Stengel have their fingers crossed about opening day possibilities for these men.

## Mundo di Rogans

(Continua di pagini 4)

Algun hende ta kere cu e bocchi grandi cu e rogans ta carga entre e dos partinan di e seccion mas abao di su pick y cu ta corra parcialmente banda di su garganta ta un molina. Otro ta kere cu e bocchi ta permanentemente duro.

"Bocchi di un rogans", asina Sr. Bartels a bisa, "ta un organo ingenioso cu ta sirbi manera un net di aterizaje." E bocchi mes ta un membrano elastico cu e rogans por haci mas grandi ora e ta coi of guli piscu. Generalmente e pick ta largo y recto.

Rogansnan na Aruba ta turistanan cu a keda atras. Nan ta broei mas na norte, den Caribe y den continente di Estados Unidos. Tin periodonan cu e parjanan aki ta hopi scars na nos costanan, generalmente durante e periodo di broei cu ta cai mei-mei di anja. Algun di e biuvnan no ta preocupa pa e viaje norte, asina ta cu bo por mira algun di e parjanan aki durante henter anja.

"Den planta di produccion inmensa di naturaleza," Sr. Bartels a bisa, "rogansnan tin, mescos cu tur otro animal y plantanan, un tarea bon definá. Nan tarea ta pa reduci surplusnan di un clase specifico di piscu, esta esnan cu ta biba na superficie y cu ta mucho grandi pa otro parjanan mas chikito.

"E parti mas importante di nan trabao ta pa fertiliza e suela seco ariba cual nan ta sinti. Ta asina suela di baranca ta worde haci adecuado pa crecimiento di planta. Incidentalmente, mayoria parja di lamur tin e tarea aki, maske tin algun excepcion," el ta bisa.

Hende por bisa cu rogansnan ta danjoso y ta limita humanidad su surtido di piscu. Den e respecto aki no tin mester di preocupa ariba nos amigo rogans. Examinacion di muestreanan di piscu cogi door di rogansnan a munstra cu solamente un parti masha chikito di nan a resulta di e sorto cu ta worde considerá 'hon pa come' door di hendenan.

Tin rumor cu rogansnan tahata

broei na Westpunt den tempo pasá. Recientemente ningun neishi a worde reportá. Rogansnan ta traha neishi bruto, sea ariba terra of den matanan abao y ta pone das of tres webo color blanco. E neishi of e webonan no mester worde molestia nunca, sino e rogansnan lo worde discorura pa traha nan cas ey. Si bo mira un neishi, Sr. Bartels -- kende ta haci un estudio di e cosnan aki y ta reporta su resultadonan na gobierno -- lo ta masha contento pa tende tocante bo descubricion.

Pero si nan ta traha neishi aki of no, ta un cantidad di placer pa sinta waak e rogansnan sambuya y patrulla banda di costanan di Aruba.

How It Began:

## Glass Making Was Discovered By Chance From a Supper Fire

Shinar, the Phoenician shipmaster from the ancient city of Tyre, gave orders to bring the galley close inshore. Night was near and it was time to tie up the vessel and go ashore. Although the Phoenician traders dared the wide ocean in their little vessels, no wise master sailed at night if there was a harbor at hand.

The landing was made on the banks of the River Belus in what is now the Holy Land and the ship was anchored safely. The master did not mean to take any chances with his cargo of nitrum, an impure form of soda, that he had brought from Egypt, so it was dark before the sailors were free to prepare their evening meal.

"Master," one of the sailors came to speak to Shinar, "we can find no stones upon which the cooking pots may rest. Will you give us permission to take some lumps of nitrum from the vessel? Doubtless when the fire dies down the lumps can be returned to the cargo."

Grudgingly Shinar gave his consent. Then as the sailor went for the lumps of nitrum, the sailing master called to him. "Wait. I will find the lumps for you. Some of those with streaks of limestone will be good enough for the pots to rest upon."

So the supper was cooked and the lumps of crude bicarbonate of soda grew hotter and hotter. Fortunately the potage was done and had been eaten when it happened. Shinar, looking at the dying fire, saw that the lumps of nitrum were melting, and sinking down into the sand that supported them had fused together to make a strange new material, magically unlike any of its three ingredients.

There on the sand in little crystal rivers ran molten streams of the first glass ever made by man. Shinar was wise enough to gather the new substance when it had cooled enough to handle, and to keep the secret of its making. This secret he imparted to a few Egyptian craftsmen who soon

DISCOVERY: Shinar, looking at the dying fire, saw that the lumps of nitrum were melting.

found a way to make the first commercial glass.

The new substance, discovered by chance, proved to be more valuable to the Phoenicians and Egyptians than all the nitrum their galleys ever carried to the ancient world.

### Some Interesting Facts and Figures

The world's largest star sapphire is the Black Star of Queensland. The giant gem originally weighed 1156 carats, but now is 733 in its finished state.

The earth as a whole weighs 345 pounds per cubic foot. The heaviest rocks weigh only 200 pounds per cubic foot, therefore we know that the earth is not solid rock.

The area of the Pacific Ocean is about the same as the combined extent of the Atlantic, Indian and Arctic Oceans.

There are some 30,000 forms of bird life in the world.

Agriculture and stock-raising are the chief industries of Madagascar.

The brittle star, a cousin of the starfish, is found on the bottom of all seven seas.

## Ultimo Fecha di Entrada Pa Siman di Sanidad, Concurso di Baby

Ultimo fecha di entrada pa siman di sanidad e anja aki — Concurso di Poster y Concurso di Baby — a worde anuncia. Posternan mester ta sumeti pa April 28 y muchanan chikito mester ta registrá pa Mei 28.

Siman di Sanidad, organizá pa Lago Nurses' Glee Club, ta planeá pa Mei 4 te 8 na Lago Club. Ademas na e concursanan mencioná aki riba, e Club a planea pasamento di pelicula y dunamento di lectura.

E peliculanan lo worde pasá gratis y lecturanan lo worde duná na San Nicolas, Oranjestad y Santa Cruz. Peliculanan tocante problema-nan publico y individual lo worde munstrá tambe na otro lugarnan den henter e isla. Fechanan di e lecturanan y peliculanan lo worde anunciá mas despues.

E concurso di poster ta habri pa tur muchanan di Aruba bao 18 anja. Tres premio na placa efectivo lo worde duná pa e tres posternan cu sali mehor.

Entradanan lo worde aceptá door di C. O. St. Aubyn, gerente di Lago Club, entre merdia y 10 p.m. tur dia te April 28. Entradanan mester contene nomber, fecha di nacemento y adres di e remitente. Tur entradanan lo worde exhibi den patio di Club Mei 5 atardi.

Formularionan di entrada pa e Concurso di Baby por worde obteni cerca cualkier nurse di Lago Hospital y mester worde debolbi Mei 6. Competicion lo worde parti den dos grupo di edad; uno te seis luna bieuw y seis te 12 luna. Tres premio lo worde duná den cada grupo.

E concurso lo worde teni den sala di Lago Club Mei 8 tramerdia unda dokternan lo examina e muchanan.

### CHUCKLES

— A teacher asked a little boy if he knew how long a minute was. The little boy asked, "Do you mean a real minute, or a wait-a-minute?"

— Billy was asked what he was giving his sister for her birthday. I don't know," he said. "Last year I gave her chicken pox!"

— A neighbor asked the little girl next door how old she was. "I'm four," she replied. "When will you be five?" the neighbor asked. "On my birthday," replied the youngster.

## Puzzlemaster Returns From Trip To Quiz You About Guatemala

### Guatemala Rebus

Four facts about Guatemala are concealed in this rebus. You can unearth them by using the words and pictures to your fullest advantage:

### Scrambled Sentence

You can solve this puzzle simply by rearranging the words so they will make sense:

Indian. than per of population pure More 50 cent Guatemala's is

### Diamond

- 23 Greek portico
- 25 Light brown
- 28 Old Ireland (ab.)

## Hombenan Sokete y Muhernan Astuto

Un biaha tabatin dos muher cu tabata pleita henter ora, mescos cu algun hende muher ta gusta; y ora nan no tabatin nada otro pa pleita ariba, nan a cuminsa pleita ariba nan casá, ariba cual di nan lo ta mas sokete. Mas hopi nan pleita mas peor e asunto bira y por fin casi nan a yega na bringa, pasobra, mauera tur hende sabi, ta mas facil pa cuminsa cu pa stop, y ta un mal cos ora hende falta un poco sinti.

Ultimamente, uno di nan a bisa cu no tabatin nada na mundo cu el no por laga di haci su esposo kere, si el kier, pasobra e homber ta masha sokete. Anto e otro a contesta cu no tabatin nada asina loco na mundo cu el no por laga su esposo haci si el kier, pasobra e homber ta asina sokete cu el no sabi ni e diferencia entre letra B y un pata di baca.

"Wel, laga nos purba, cual di nos por frega nan mehor, y e ora nos lo mira ta cual ta mas sokete." Asina a keda decidi.

Ora cu e promer homber, Sr. Northgrange, a yega cas for di den bosque, su senjora a bisa: "Cielo santo yuda nos! Kiko a socede? Bo ta malo na, segun mi bo ta casi morto!"

"Nada no a pasa mi, solamente gana di come mi tin," e homber a bisa.

"Cielo ta mi testigo!" e muher a exclama, "ora pa ora ta bira mas peor. Bo cara ta mescos cu di un morto; bo mester bai drumi! E maleza di repente aki no por dura mucho!" Y asina e muher a keda teima te ora e homber a cuminsa kere berlad cu el tabata bai muri, y e muher a ponele drumi. Despues el a cruza e homber su mannan ariba su pecho, y a cerra

su wowo; y asina e muher a bistie'le su mortaje y a ponele den un caha di morto. Pero pa el no stik ey den, e muher a traha buraco na cada banda di e caha pa e homber hala rosea y waak pafor.

E otro muher a coi dos brush y a cuminsa ta limpia lana; pero el no tabatin ningun sorto di lana. Ata su casa a yega y a mira loke tabata socede. "Pero ta grandisimo cos di sokete cu bo ta haci cu bo mes ey, muher", el a bisa. "Bo por ta traha cu un wiel sin lana?"

"Sin lana", e muher a contesta. "Mi tin lana masha bon, pero bo no por mire'le. E ta di un calidad mucho fini." Asina ta cu ora el a caba di limpia tur e lana, el a coi e wiel y a cuminsa spin.

"Esta baña! Tur esey ta trabao perdi!" e homber a bisa. "Asina bo ta sinta gasta bo wiel, y sin haci nada."

"Sin haci nada!" e muher a bisa. "E hilo ta asina fini cu ta tuma mehor wowo cu di bo pa mira nan. esey ta tur."

Ora e muher a cuba di spin, el a prepara su weefstoel y a weef e panja. Despues el a saca e panja for di den e weefstoel y el a cose un flus pa su esposo, y ora esaki a bini cla el a colge'le den cashi, pero como cu ya el a convence e homber cu e flus ta mucho fini pe mira, e homber a bisa, "Oh, oh, mi ta comprende bo; e ta asina fini."

Despues di dos dia su esposa a bise'le, "Awe bo mester bai deraemento. Cunucero Northgranger a muri, y awe nan ta dera, asina ta mehor bo

bisti bo flus nobo cu mi a traha pa bo."

Si, masha bon, el mester bai deraemento. Y e muher a yude'le bisti su flus nobo, pasobra e tabata asina fini, cu el por kibre'le na werki si el sol bai bistie'le.

Ora el a yega na cas di morto, nan tur a bebe asina hopi, y bo por imagina cu nan tristeza no tabata mas grandi ora nan a mire'le den su bistir nobo. Pero ora e fila a coi camina pa santana, y e homber morto a waak door di e buracunan den e caha, el a dal un grito duro di haramiento. "Esta baiua!" el a bisa, "mi no por yuda cu mi ta hari na mi mes deraemento, pero no ta Olof Southgrange ta camina ey den su manga di flanel, sin ningun tiki di flus!"

Ora e cargadoruan di morto a tende asina, mes ora nan a corre kita e tapadera for di ariba e caha. Y e otro homber, esun bisti cu su flus nobo, a puntra com por ta cu e homber aki, na kende su morto nan a bebe asina tanto rom, por ta drumi den su caha ta hari y ta papia, mientras lo tabata mas apropiado si el yora.

"Ah!" cunucero Northgrange a bisa, "ainda nunca lagrima a salba un hende for di su graf — pesey mi a hari te ora mi a biba atrobe."

Pero fin di nan conversacion tabata cu nan a realiza cu nan casá a hunga nan e trikinan ey. Asina ta cu e dos homberuan a bai cas y nan a haci e cos di mas mehor cu nan a yega di haci durante hopi tempo; y si cualkier hende ta desca di sabi kiko nan a haci, auto mehor nan bai consulta e carbatji.
